

CredibleShot

PARTNERSHIP BRIEF

A professional headshot benefit people can use when they need it.

Private, identity-first AI headshots with manual quality review - available year-round for students, alumni, clinicians, and employees.

Universities | Employers | Healthcare | Workforce programs

A FLEXIBLE, LOW-LIFT PROGRAM

Complement the photo day. Cover the gaps.

CredibleShot gives each participant a private workflow from upload through delivery. It can support remote people, overflow demand, later hires or graduates, and anyone who needs an updated image after an in-person event.

Recognizable identity

Natural age, skin tone, facial structure, and direct eye contact stay the priority.

Manual quality review

Every completed set is reviewed before customer delivery.

Private by design

The organization does not handle participant photos or private result links.

Measurable adoption

Dedicated links and benefit codes show participation without exposing images.

Year-round access

People can participate wherever they are and whenever the need appears.

No cost to the organization

CredibleShot handles setup, delivery, support, privacy, and benefit-code reporting.

START WITH A FOCUSED PILOT

No invoice. One tracked link. Clear results.

We recommend the audience, benefit structure, sharing channels, and measurement plan.
